Which mode should I use?

Win / Mac: match your computer.

Wired: USB-C data cable. Wireless: Bluetooth or dongle. Off: power down.

How do I pair Bluetooth?

Select Wireless. Hold Fn + 1, 2 or 3 for 3 seconds, then pair in your computer's Bluetooth settings.

What does the knob do?

Turn to adjust volume. Press to mute.

[Installation diagrams](#)

Can I remap keys?

USB + Wired, then NuPhy IO in Edge or Chrome. Customize keys, lighting and knob actions.

[Open NuPhy IO](#)

Still won't connect?

Dongle: hold Fn + 4 for 3 seconds, then reinsert it. Avoid metal USB hubs.

Bluetooth: forget the saved device and pair again. Check firmware in NuPhy IO if needed.
